To All Plan Holders

Reference: **Reedsport School District 105
Reedsport High School Seismic Retrofit**

Subject: **Addendum #2 for Engineering Services RFP**

Addendum Items:

The following is a revision to the Request For Proposals (RFP) for above referenced project addressing questions received throughout the RFP process:

1. Will you please clarify the request for 3 **letters of recommendation** in 4b of the RFP? Is the intent to include a letter from each reference in addition to contact information? If so, are these letters included in the page count
 - a. Yes, the intent is to include a letter from each reference. These letters will not be included in the page count.
2. How is the school district planning to handle geotechnical services?
 - a. The District is planning to hire a geotechnical consultant directly with the assistance of the design team following design team selection.
3. Will the school district procure directly or are the architect-engineer teams to include this service on their team?
 - a. See question 2 response.
4. If geotechnical services will be directly procured by the school district, will an RFP be issued for these services and what is the anticipated timeline for these services?
 - a. Yes, geotechnical services will be hired directly by the district. This is anticipated to take place before the end of the year through a proposal process.
5. As a geotechnical engineering consultant, we would support the prime architect/engineer. In this regard, we are interested in learning which firm(s) have expressed interest in pursuing this project and which firm(s) attended the preproposal meeting.
 - a. WRK Engineers and ZCS Engineering and Architecture attended the preproposal meeting
6. Can you please provide any as-constructed plans for the portion of the building being retrofit?
 - a. Yes. Please see the plans provided on the District website.
